ABOUT ME

Frontend Developer Trainee with over 12 months of intensive training in the MERN Stack (JavaScript, React.js, Node.js). Currently pursuing a Technical Degree in Programming at TECLAB. Specialized in building User Interfaces with React and developing high-performance responsive websites.

- Passionate about continuous learning, problem-solving, teamwork, and experienced in Agile development methodology (Scrum).
- Seeking a Trainee role to apply technical skills in frontend projects and contribute to team goals.

PROJECTS/EXPERIENCE

Sports Clothing E-commerce (React JS) *Personal Project* | 2024

- Developed a Single Page Application using React.js and React Router for seamless navigation.
- Implemented state management with React Hooks and integrated a simulated API for product data consumption.
- Designed a fully Responsive UI to ensure optimal visualization across multiple devices.
- Code: github.com/lucianodilascio/curso-react

Footwear E-commerce (Vanilla JavaScript) *Personal Project* | 2024

- Built a functional shopping cart and managed the DOM using Vanilla JavaScript.
- Applied complex data structures to handle events and dynamic user interactions efficiently.
- Code: github.com/lucianodilascio/proyectoJavascript

Sneaker Store Landing Page (HTML/CSS) *Personal Project* | 2023

- Designed and structured a static e-commerce site using HTML5 and CSS3 (Flexbox/Grid).
- Focused on UI/UX best practices and code structure to ensure accessibility and visual appeal.
- Live Demo: lucianodilascio.github.io/proyecto
